Description Hey there, I am using the parabola repo on Archlinux just for iceweasel. On the Arch repo's icu version 56 is ready and pacman wants to update it. However, the parabola iceweasel forces icu to be version 55.1 which now stops pacman from doing any updates. Could you please change the dependency icu=55.1 to just icu ? Thanks !

This is coming from the kitchen, Iceweasel 42 is in final testing, and if everything goes OK, it will appear ASAP.
