It seems I can't update the bug status nor assign the task to myself, so I will inform with a comment that [https://wiki.parabola.nu/Parabola\\_ARM\\_installation](https://wiki.parabola.nu/Parabola_ARM_installation) has been updated with all the information from the previous draft.

The GTA04 section still looks out of place because we used a different criteria (bootloader > hardware family > device) to order the other devices.
