

Documentation - Bug #881

Bug # 872 (fixed): Duplicated standalone installation instructions need to be merged

Add links to the ARM installation and migration guides in the wiki main page.

Description	
<p>We advertise armv7h support a few occasions here and there but our most important pieces of documentation regarding this architecture are not present in the main wiki page: https://wiki.parabola.nu/Parabola_ARM_installation https://wiki.parabola.nu/Migration_from_Arch_Linux_ARM</p> <p>I argue that both the port and the guides are mature enough to be exposed to the general audience, even though the bootloader situation isn't yet as good as we want. Knowledgeable ARM board owners could easily get Parabola installed on their systems, and quality of these wiki pages could benefit from them.</p> <p>So someone is needed with edit privileges to make the change.</p>
