

## Servers - Bug #913

### [labs] Enable account-less bugreports

2016-01-09 12:13 AM - GNUtoo

<b>Status:</b> open	<b>% Done:</b> 0%
<b>Priority:</b> bug	
<b>Assignee:</b>	
<b>Category:</b>	
<b>Description</b> I'm not sure if it's desirable. I've also no idea on how that can be implemented in a way that would prevent spam. The user on IRC just wanted not to have to handle yet one more account and was looking for a way to bugreport without creating an account for each project that user wants to bugreport to.  Denis.

there is preliminary bug reporting tool in the parabola-laf package - it currently is used only internally by calamares to post install failures but could be generalized into a user tool something like debian has

the real issue though is that anonymous bug reports could be abused so it may still be a good idea to require a registered account as debian does
