Bug # 922 (fixed): Migrate remaining services to Let's Encrypt certs

[nginx / pur.parabolagnulinux.org] Use Let's Encrypt

2016-01-30 04:54 PM - lukeshu

Status: fixed	% Done: 100%
Priority: bug	
Assignee: lukeshu	
Category:	
Description	
Wait a week, then add pur.parabolagnulinux.org to our LE cert (1 hit rate limiting).	
Then, remove the override for it in /etc/nginx/sites/alias-parabolagnulinux.org.conf.	

History

To clarify what happened:

Because to simplify configuration, we're putting all domains on the same cert. Because there were issues authorizing some domains, I'd add a one domain at a time, troubleshoot, and have it re-issue the cert with the new domain added. However, it is limited to re-issuing a cert to 5 times a week. In those 5 times, I got all subdomains that I'm aware of except for pur.parabolagnulinux.org.

- % Done changed from 0 to 100

- Assignee set to lukeshu

- Status changed from open to fixed

The `acmetool reconcile` cronjob got the cert; I've now removed the override in the nginx config.
