Packages - Packaging Request #947

[python-tensorflow] add tensorflow

2016-02-25 07:20 AM - jluttine

Status:	not-a-bug	**% Done:**	0%
Priority:	wish		
Assignee:	encyclomundi		
Category:			

Description

Request: Add Google's TensorFlow as packages python-tensorflow and python2-tensorflow.

Homepage: https://www.tensorflow.org/

GitHub: https://github.com/tensorflow/tensorflow

There are several AURs, but I suppose this is the best one:
https://aur.archlinux.org/packages/python2-tensorflow/
Based on this, we should also create python-tensorflow in addition to python2-tensorflow.

Other AURs:
https://aur.archlinux.org/packages/python-tensorflow-git/
https://aur.archlinux.org/packages/tensorflow-git/
https://aur.archlinux.org/packages/python2-tensorflow-cuda/

I suppose we don't need to compile with CUDA/GPU support because that would require closed source CUDA.

Any updates on this?

#3 - 2020-01-13 07:01 AM - oaken-source

- Status changed from open to not-a-bug

tensorflow and python-tensorflow are packaged by arch, so this packaging request can be closed.
