<b>Description</b>	
<p>I'm not sure whether Iceweasel addons should be added as packages or not. I can find some addons from the repos (e.g., ublock) and I feel that's better than downloading addons from random webpages (see, for instance, <a href="https://wiki.debian.org/Mozilla">https://wiki.debian.org/Mozilla</a> ). Anyway, here's some info:</p> <p>Zotero is the only research tool that automatically senses content in your web browser, allowing you to add it to your personal library with a single click.</p> <p>FSF: <a href="https://directory.fsf.org/wiki/Zotero_client">https://directory.fsf.org/wiki/Zotero_client</a></p> <p>Download: <a href="https://www.zotero.org/download/">https://www.zotero.org/download/</a></p> <p>GitHub: <a href="https://github.com/zotero/zotero">https://github.com/zotero/zotero</a> (I'm not sure if this is the Firefox extension or stand-alone client, but I hope it's the Firefox extension)</p> <p>AURs only include the stand-alone client.</p>	

### History

Addon is opensource, but server appears to be proprietary as you cannot setup your own instance. SaaS.
