<b>Description</b> Steam maintains a userland driver for their controllers. Here's the github project: <a href="https://github.com/ynsta/steamcontroller">https://github.com/ynsta/steamcontroller</a> Here's the package at AUR: <a href="https://aur.archlinux.org/packages/python-steamcontroller-git/">https://aur.archlinux.org/packages/python-steamcontroller-git/</a>
