

Packages - Bug #996

Execv fails and unknown media types when upgrading

2016-04-29 09:22 AM - jluttine

Status: fixed	% Done: 0%
Priority: bug

Description	
I get the following errors when updating:	
<pre>:: Running post-transaction hooks... (1/3) Updating icon theme caches... call to execv failed (Permission denied) error: command failed to execute correctly (2/3) Updating the desktop file MIME type cache... (3/3) Updating the MIME type database... Unknown media type in type 'all/all' Unknown media type in type 'all/allfiles'</pre>	
Is this a bug or should I fix something or just ignore these?
