Hello everyone, hope you all are doing well.

I am working on the desktop design for the Parabola GNU Linux Cinnamon Edition. This package is essential to the current look and feel of the desktop. Would it be possible to make this a priority to be packaged up into the official Parabola repos? It has been 2 years since this request was originally made.

https://github.com/numixproject/numix-icon-theme-circle

Take care and have an awesome day :)
